Number of Global Missionary Partners [GMPs] received:	19
Number of Global Missionary Partners [GMPs] sent:	11

The full IMB Annual Statistical Report Based on 2023 Data is available for download at: www.imb.org/ASR

The International Mission Board's Annual Statistical Report (ASR) contains the most accurate information for the stated reporting period available at the time of publication. Figures reported are for work related to IMB personnel and their close, indigenous baptistic partners only. Since 2009, the ASR no longer includes reports from partner conventions and unions. Major movements and baptistic church planting partners that are self-sustaining and require only occasional guidance and assistance from IMB personnel are removed from the statistics annually. This is a cause for celebration but can result in some statistics being different from earlier reporting periods.

After publication, the Board's Global Research Department continues to process both new and revised reports as field personnel continually strive to provide the most accurate picture of the Board's work and influence during the given reporting period. New or revised reports may be submitted for a variety of reasons, including typographical errors in the original report, newly received or corrected information, clarification of reporting categories, etc.

All analyses utilize the most current data for the reporting period available at that time, including any new and revised reports submitted since publication. Thus, subsequent ASRs will reflect corrected data and may differ from previously published reports. For current data regarding a given reporting period, including the latest revisions, contact IMB.
